

PREVIEW OF EXCURSIONS

Excursion: Bednar Park, 1020 Vienna

Excursion leaders: Stefan Burgstaller, Lukas Landler

Description: This approximately one-hour-long excursion to an urban population of the green toad will lead us into the 2nd district of Vienna. Because the beginning of April usually marks the start of the green toad's breeding season, we should be able to observe the reproductive processes live. We expect to find several toads calling in the local ponds. With some luck we might also be able to observe toads directly during spawn deposition.

Place: Bednar Park, 1020 Vienna, <https://maps.app.goo.gl/1j3fwqS23pqFRDKi8>

Date: Saturday, April 6, 2024, 8:00 pm

Fee: 0 EUR

Max. 20 persons

Excursion: Main Library TU Wien (Vienna University of Technology), 1040 Vienna

Excursion leaders: Doron Goldfarb

Description: Davis, the Data Visualisation Space in the TU Wien Library, is designed as an experimental learning space for teachers and students as well as an open workspace for collaboration, including Citizen Science activities. A 3D-capable, floor-to-ceiling LED wall enables the intuitive and immersive experience of complex interrelationships of digital data through visualisation. An almost five-meter-long touch wall is used to develop and present interactive content. As an interdisciplinary and cross-faculty space, the library thus offers low-threshold, experimental access to the communication of scientific research.

Max. 20 persons

Excursion: Jedlesee, 1210 Vienna

Excursion leaders: Maria Hoi-Leitner

Description: Within a citizen science project of the nature conservation association of Vienna by order of the City of Vienna lots of nest sites of birds nesting on buildings were mapped. Meanwhile these informations are accessible online and are used to protect nest sites in the course of renovation of buildings. On this excursion some of the nest sites will be visited and you can learn a lot about their inhabitants as well as measures to protect them.

Language: English
